Faculty of Computer Science and Information Technology

Assignment/Project/Report Cover Sheet

Student Name (lecture group no:)	Student ID Number	Group	Signature
Chai Hui Qing	98426	CTPL	
Princess Nefertiti Cleopetra Peter	100789	CTPL	
Tracy Anak Garit	101228	CTPL	
Puteri Nur Liyana Imanina Abdullah	100804	CTPL	<i>P. Nurliyana</i>

Course Code: TMF2034		Course Name: Database Concept and Design	
Assignment/Project/Report Title:	Project	Lecturer:	AP Dr. Lee Nung Kion
Due Date: 21 June 2025		Date Submitted: 26 June 2025	

This cover sheet must be completed, signed and firmly attached to the front of the submission. All work must be submitted by the due date. If an extension of work is granted, an extension acknowledgement slip must be signed by the lecturer/tutor and attached to the assignment/project/report. Please note that it is your responsibility to retain copies of your assignment.

Plagiarism and Collusion are methods of cheating that are addressed in the Peraturan Akademik Universiti Malaysia Sarawak para 11: Etika Akademik

Plagiarism

Plagiarism is the presentation of work which has been copied in whole or in part from another person's work, or from any other source such as the Internet, published books or periodicals without due acknowledgement given in the text.

Collusion

Collusion is the presentation of work that is the result in whole or in part of unauthorized collaboration with another person or persons.

Where there are reasonable grounds for believing that cheating has occurred, the only action that may be taken when plagiarism or collusion is detected is for the staff member not to mark the item of work and to report or refer the matter to the Dean. This may result in work being disallowed and given a fail grade or if the circumstances warrant, the matter may be referred to a Committee of inquiry for investigation. Such investigation may result in the matter being referred to the University Discipline Committee, which has the power to exclude a student.

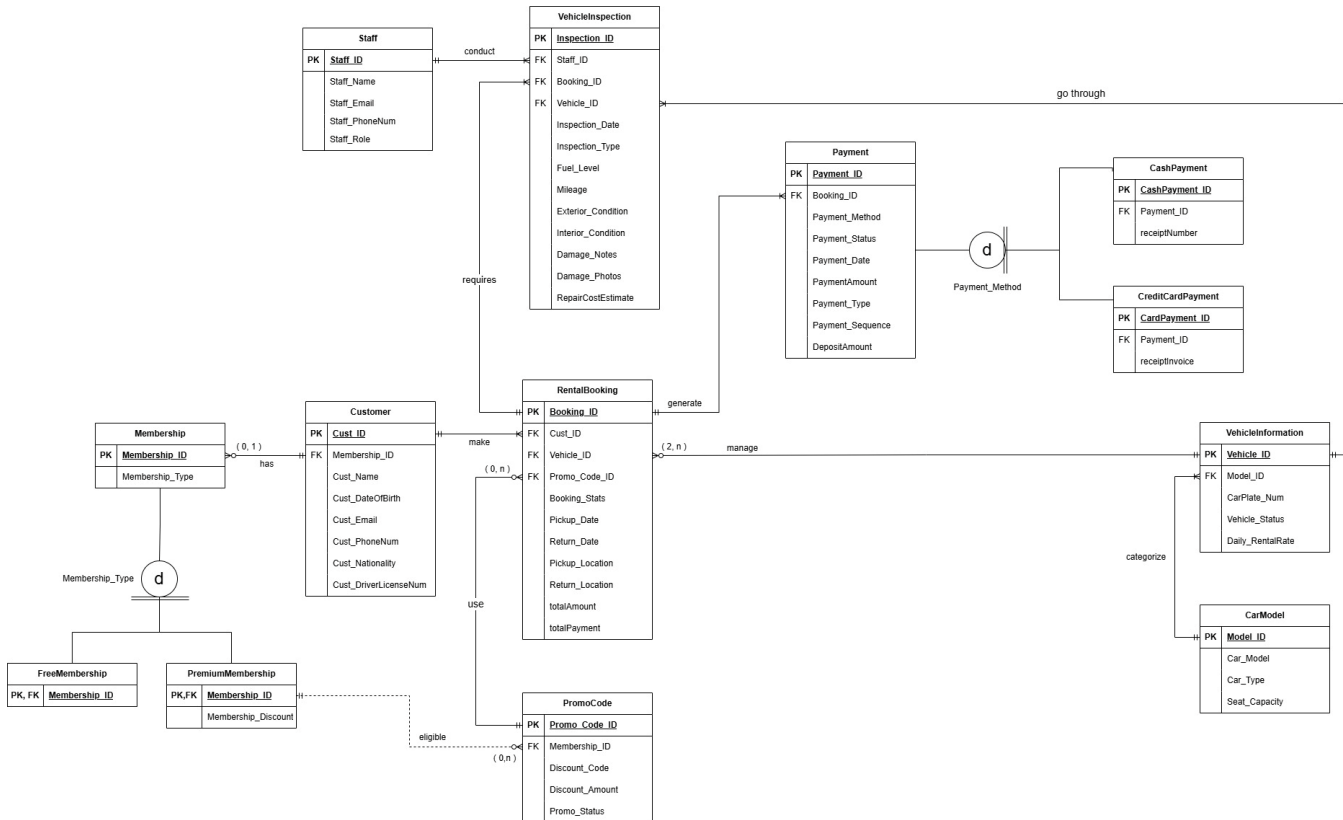

Upon placing signature above, I certify that I have not plagiarized the work of others or participated in unauthorized collusion when preparing this assignment.

I also certify that I have taken proper care in safeguarding my work and have made all reasonable efforts to ensure that my work is not able to be copied.

MARK :

Relational Database Diagram

1. Updated ERD

Justification:

1. Membership Table is changed into a specialization hierarchy. Membership acts as the supertype while FreeMembership and PremiumMembership as subtypes. Discriminator attribute Membership_Type is added with disjoint constraint. This will clearly distinguish the type of membership as Free and Premium Membership has different benefits. It prevents invalid membership combinations and ensures that each customer has only membership type.
2. The Payment Table is also changed into a specialization hierarchy. Payment acts as the supertype while CashPayment and CreditCardPayment as the subtypes. Payment_Method works as the discriminator attribute. This directly addresses the previous requirement that “customers may choose to pay using either credit card or cash. It will also distinguish the payment methods since it requires different tracking information. It also supports the statement “up to two split payments per rental booking” requirement by allowing multiple payment records with different methods.
3. More attributes are added into VehicleInspection attributes (Damage_Notes, Damage_Photos, RepairCostEstimate) for clear damage documentation.
4. PromoCode relationship is modified as now it has direct connection to Membership entity to fulfill the promo codes are “available exclusively for premium members” in the requirements
5. Clearer attribute name (Cust_Contact → Cust_PhoneNum & Cust_DOB → Cust_DateOfBirth)
6. It has refined relationship cardinalities and the correct type of relationship compared to the previous ERD.

2. Relational Database Schema

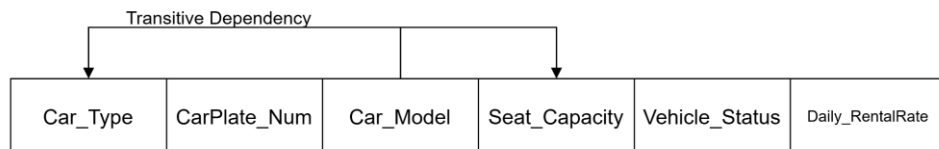

1. Staff(Staff_ID, Staff_Name, Staff_Email, Staff_PhoneNum, Staff_Role)
2. Customer(Cust_ID, Cust_Name, Cust_Email, Cust_PhoneNum, Cust_DateOfBirth, Membership_ID, Cust_Nationality, Cust_DriverLicenseNum)
3. Membership(Membership_ID, Membership_Type)
4. FreeMembership(Membership_ID)
5. PremiumMembership(Membership_ID, Membership_Discount)
6. VehicleInformation(Vehicle_ID, CarPlate_Num, Vehicle_Status, Daily_RentalRate, Model_ID)
7. CarModel(Model_ID, Car_Model, Car_Type, Seat_Capacity)
8. RentalBooking(Booking_ID, Cust_ID, Vehicle_ID, Promo_Code_ID, Booking_Stats, Pickup_Date, Return_Date, Pickup_Location, Return_Location)
9. Payment(Payment_ID, Booking_ID, Payment_Status, Payment_Method, Payment_Date, PaymentAmount, Payment_Type, Payment_Sequence, DepositAmount, totalAmount, totalPayment)
10. CashPayment(CashPayment_ID, Payment_ID, receiptNumber)
11. CreditCardPayment(Payment_ID, CardPayment_ID, receiptInvoice)
12. PromoCode(Promo_Code_ID, Discount_Amount, Membership_ID, Discount_Code, Promo_Status)
13. VehicleInspection(Inspection_ID, Staff_ID, Booking_ID, Vehicle_ID, Inspection_Date, Inspection_Type, Fuel_Level, Mileage, Exterior_Condition, Interior_Condition, Damage_Notes, Damage_Photos, RepairCostEstimate)

3. Normalization

Based on the ERD above, almost all the tables pass 1NF, 2NF and 3NF normalization except for VehicleInformation where both of them violate the 3NF normalization.

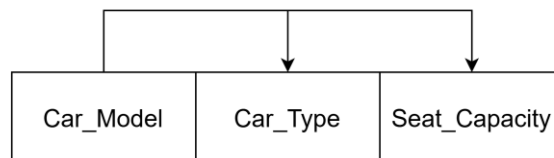

VehicleInformation	
PK	<u>Vehicle_ID</u>
	Car_Type
	CarPlate_Num
	Car_Model
	Seat_Capacity
	Vehicle_Status
	Daily_RentalRate

VehicleInformation

Transitive Dependency exists in the table for the Car_Model where this attribute could determine the Car_Type and Seat_Capacity. Both Car_Type and Seat_Capacity are functionally dependent on Car_Model meanwhile Car_Model is functionally dependent on Vehicle_ID. This causes data redundancy where the same car model information is repeated for each vehicle. There will also be update anomalies where changing a car model's type or seat capacity requires updating multiple records.

CarModel

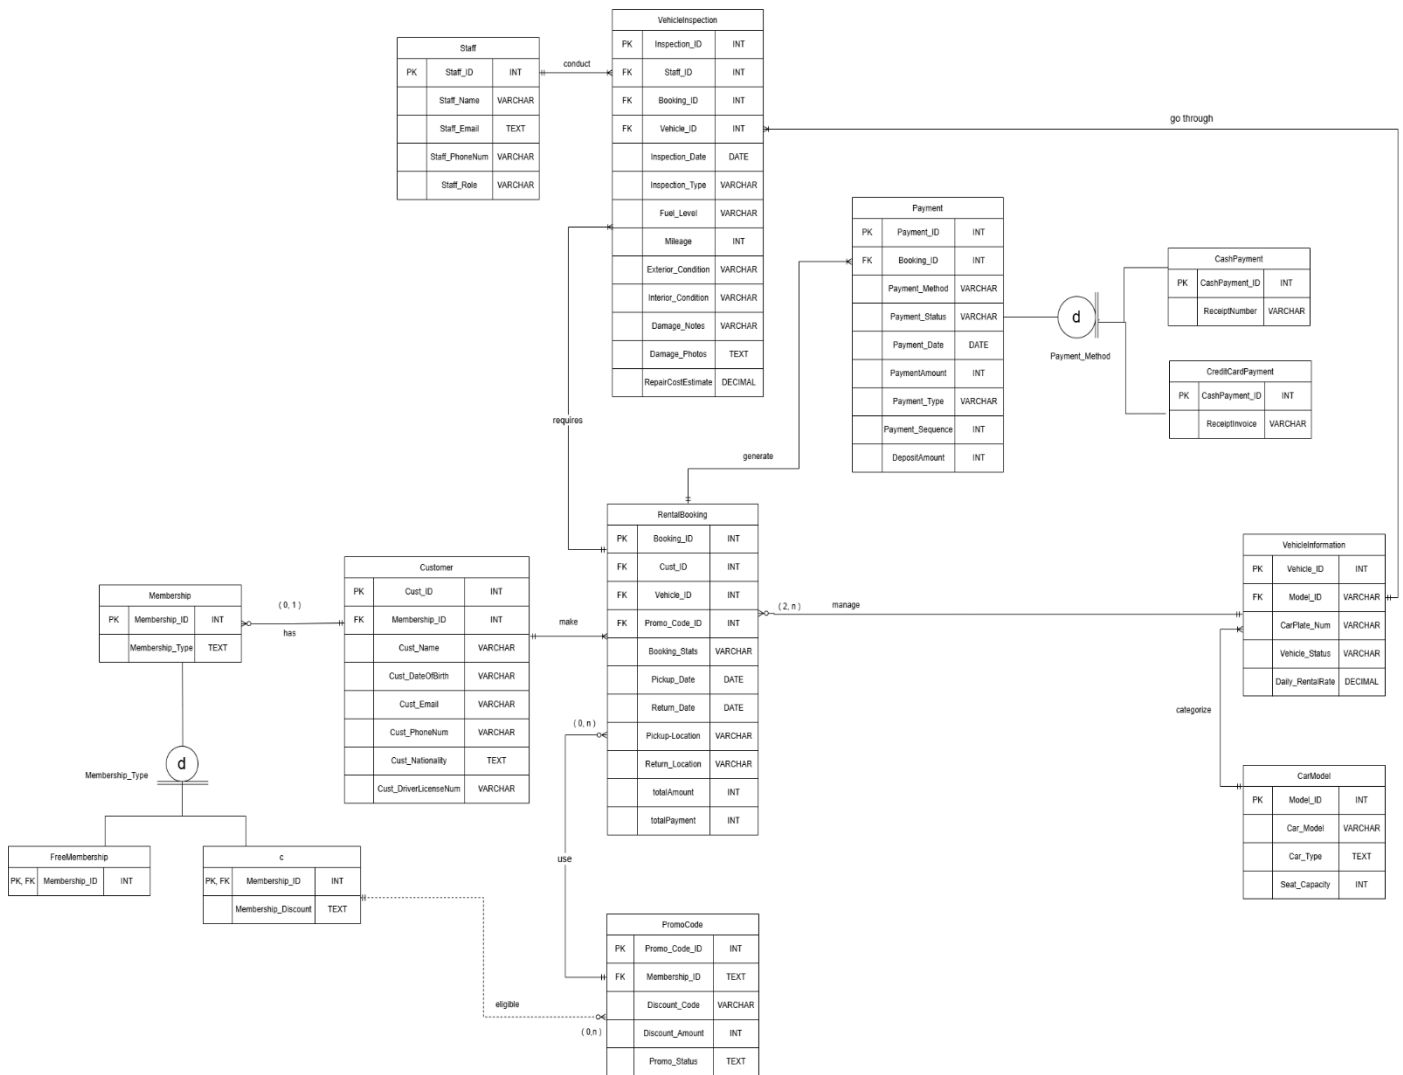

VehicleInformation	
PK	<u>Vehicle_ID</u>
FK	Model_ID
	CarPlate_Num
	Vehicle_Status
	Daily_RentalRate

CarModel	
PK	<u>Model_ID</u>
	Car_Model
	Car_Type
	Seat_Capacity

To solve this problem, a new table is created for Car_Model and updates the VehicleInformation table. This eliminates the redundancy issues and the car model information will be stored once. The data will also be consistent as there is no duplicate car type and capacity information.

4. Crow's Foot relational database diagram

A screenshot of a WhatsApp chat conversation. At the top, the chat header shows 'DATABASE TMF2034' with '4 members' and a 'Pinned Message #1' with a link to a Google Drive file. The chat background is dark with a pattern of small, light-colored icons. The conversation includes several messages from users 'Lia MC' and 'TT'. Lia MC's messages are in green bubbles, and TT's messages are in orange bubbles. The messages discuss the use of SQL, Python, and PHP for database applications, with TT expressing some confusion about the complexity of PHP. The chat interface shows typical WhatsApp elements like a back arrow, a plus icon for more options, and a search icon at the top. At the bottom, there is a text input field and a send button (a white arrow in a dark circle). The messages are timestamped at the bottom right of each bubble.

A screenshot of a WhatsApp chat interface. At the top, there's a header bar with a back arrow, a profile picture placeholder labeled "DT", and contact information: "DATABASE TMF2034" and "4 members". Below this is a pinned message from "unimas-my.sharepoint.com/...". The chat history shows several messages:

- A yellow bubble from "T1": "Yg no.1 tu hampir siap..just perlu cek ada tertinggal ke or x...itu ja" (12:01).
- A yellow bubble from "T1": "Yg no.2 bukan kamu buat?" (12:02).
- A blue bubble from "Tracy 10/2": "Yg no.1 tu hampir siap..just perlu cek ada tertinggal ke or x...itu ja"
"Ada saya add beberapa yg tertinggal (dalam report kan?) Perlu ada diagram dia kan?" (12:07).
- A blue bubble from "Tracy 10/2": "So saya tinggal nak buat crow's foot lah kan?" (12:07).
- A grey bubble from "Cleo 100789": "Ada saya add beberapa yg tertinggal (dalam report kan?) Perlu ada diag...
Yg schema tu tak perlu ada diagram just no.2 je" (13:04).
- A grey bubble from "Cleo 100789": "So saya tinggal nak buat crow's foot lah kan?"
- A yellow bubble from "T1": "Yup" (13:04).
- A blue bubble from "Baikks faham sudah hehe" (13:07).

The bottom of the screen shows a keyboard and a partial view of a document titled "Payment Sequences" with fields like "id_payment_sequences", "id_invoice", "id_customer", "id_supplier", Solve PHPMyAdmin Access Denied for User (Top 2 Methods)

The error: phpmyadmin access denied for user 'root'@'localhost' (using password no) when trying to access phpmyadmin xampp on your local server in a c...

100 %

FIX

Peggy 12/8

Lepas reinstal, all data hilang aldy 14:03

Lia MC

After you reinstall, can run again or not your xampp? 14:04

Peggy 12/8

Can 14:05

Lia MC

Okayy your php still safe kan? 14:05
